TOLEDO SCALES

NO SPRINGS
HONEST WEIGHT

MADE IN CANADA

WHY TOLEDO SCALES GIVE "HONEST WEIGHT"

WEIGHING is simply measuring the force of gravity. There is only one never-varying measure of gravity, and that is gravity itself. Springs vary, but the pull of gravity is constant and unchanging.

It is this constant, never-changing pull of gravity which operates the pendulum in Toledo Scales; and the pendulum automatically counter-balances the load on the platter, thereby measuring the weight of the load by gravity itself.

It is the Pendulum that makes Toledo Scales automatic without springs, and therein lies their great practical advantage.

It is the Pendulum that makes possible that confidence-inspiring, trade-bringing slogan, "TOLEDO—NO SPRINGS—HONEST WEIGHT."

SCALES to weigh anything from an ounce of spice to thirty tons of steel.

SCALES for Groceries, Meat Markets, Confectioneries, warehouses, flour mills, abattoirs, dairies, cotton mills and factories.

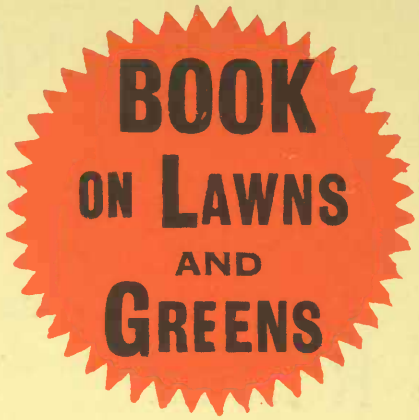
Write for this



Free to green keepers and others who desire the latest information on the building of a new Club Green or renovating an old lawn.

We quote Special Prices to Clubs, Institutions, Parks and others who require seed in large quantities.

LAWNS AND GREENS

It is most important that the lawn should be sown with a mixture of grass seeds especially adapted for the purpose required. A mixture suitable for a Park or Golf Course would be quite unfit for a private lawn, Bowling or Putting green. All the finest grasses that are most suitable for the formation of a lawn when grown for seed, produce very much less weight of seed per acre than do the coarser growing varieties, consequently the cheaper the mixture the coarser the turf. We maintain that the finest dwarf growing grasses are the most economical even for large areas, as the turf formed by the dwarf compact habit of the finest grasses requires to be mown only about half as many times as a turf formed of coarser growing varieties.

An Appeal To Your Judgment

DON'T WISH ! — ACT !

Here, within walking distance of one of the greatest industrial plants in the entire world, right in the center of what before many years will be a city of at least 50,000 persons, and closer to the Detroit City Hall than is Highland Park, an area of more than 324 acres is being developed into wide, deep homesites, in the center of which is a Park of 20 acres, equipped with fenced-in playgrounds and all the other paraphernalia for children to play almost at their own doors, free from perils of street traffic.

This unique development, carefully thought out and carried out by men of many years' successful experience, on land bought for much less money per acre than mere subdivision property miles beyond, can be purchased.

With year-around maintenance of the highest order, carried out by a force of men and equipment continually employed, and—

YOU ARE TOLD OF IT NOW,

What will you say to yourself five years hence, if you let this chance slip by?

We are willing to stake our reputation on the statement that we offer one of the biggest, safest and most profitable real estate investments ever offered in the Border Cities.

SEE IT FOR YOURSELF.
